

**80/288/NP****NEW WORK ITEM PROPOSAL**

Proposer <b>Secretary TC 80</b>	Date of proposal <b>February 2001</b>
TC/SC <b>TC 80</b>	Secretariat <b>UK</b>
Date of circulation <b>2001-02-09</b>	Closing date for voting <b>2001-05-11</b>

A proposal for a new work item within the scope of an existing technical committee or subcommittee shall be submitted to the Central Office. The proposal will be circulated to the P-members of the technical committee or subcommittee for voting, and to the O-members for information. The proposer may be a National Committee of the IEC, the secretariat itself, another technical committee or subcommittee, an organization in liaison, the Committee of Action or one of the advisory committees, or the General Secretary. Guidelines for proposing and justifying a new work item are given in ISO/IEC Directives, Part 1, Annex Q (see extract overleaf). **This form is not to be used for amendments or revisions to existing publications.**

**The proposal** (to be completed by the proposer)

**Title of proposal**

Displays for shipborne installation of automatic identification system (AIS) in VHF.

<input checked="" type="checkbox"/> Standard	<input type="checkbox"/> Technical Report
--	---

**Scope** (as defined in ISO/IEC Directives, Part 3, 6.2.1)

To: Specify the minimum safe operational & performance requirements and methods of testing & required test results for displays for AIS, taking into account other associated IEC International Standards and existing National Standards as applicable.

**Purpose and justification**, including the market relevance and relationship to Safety (Guide 104), EMC (Guide 107), Environmental aspects (Guide 109) and Quality assurance (Guide 102) . (attach a separate page as annex, if necessary)

- To provide a minimum safe International Standard for the display of safety related navigational information obtained by AIS installation.
- To complement IEC 61993 series and other International Standards. This work cannot be included in the current version of IEC 61993-2 because the guidelines needed from IMO will not be available in time for inclusion in IEC 61993 series- but will become a normative annex.
- To provide a consistent and safe minimum performance standard that is internationally acceptable, thus avoiding substandard marine craft AIS displays being produced.

<b>Target date</b>	for first CD 1 year from start	for IS 1 year from CD
Estimated number of meetings 6	Frequency of meetings 4 per year	Date and place of first meeting: TBA
Proposed working methods	<input checked="" type="checkbox"/> E-mail	<input type="checkbox"/> ftp

**Relevant documents to be considered**

IEC 61993-2, IEC 60945, IEC 61162, ITU 1371, ITU 1084 & any other associated IEC Standards and various National standards or requirements as appropriate.

**Relationship of project to activities of other international bodies**

IEC TC 80: WG 5, WG 6, WG 8A., WG10 and MT 1.

<b>Liaison organizations</b> CIRM, RTCM , IALA.	<b>Need for coordination within ISO or IEC</b> no

**Preparatory work**

Check one of the two following boxes

☐

A draft is attached for vote and comment

☒

An outline is attached

We nominate a project leader as follows in accordance with ISO/IEC Directives, Part 1, 2.3.4 (name, address, fax and e-mail):

Proposed as Convenor - Roy Lee, c/o MCA (UK) E. Mail roystonlee@globalnet.co.uk

<b>Concerns known patented items</b> (see ISO/IEC Directives, Part 2) <input checked="" type="checkbox"/> yes <input type="checkbox"/> no If yes, provide full information as an annex	<b>Name and/or signature of the proposer</b> M A RAMBAUT
--	---

**Comments and recommendations from the TC/SC officers**

<b>Comments with respect to the proposal in general, and recommendations thereon</b>		
1) Work allocation <input type="checkbox"/> Project team	<input checked="" type="checkbox"/> New working group	<input checked="" type="checkbox"/> Existing working group no:
2) Draft suitable for direct submission as <input type="checkbox"/> CD	<input type="checkbox"/> CDV	
3) General quality of the draft (conformance with ISO/IEC Directives, Part 3) <input type="checkbox"/> Little redrafting needed	<input type="checkbox"/> Substantial redrafting needed	<input type="checkbox"/> no draft (outline only)
4) Relationship with other activities In IEC WG1, WG 10 and MT 1, all of TC80  In other organizations		
Other remarks		
Proposed existing WG to carry out the task is WG8A, presently drafting future IEC 61993-2		

**Elements to be clarified when proposing a new work item****Title**

Indicate the subject matter of the proposed new standard.

Indicate whether it is intended to prepare a standard, a technical report or an amendment to an existing standard.

**Scope**

Give a clear indication of the coverage of the proposed new work item and, if necessary for clarity, exclusions.

Indicate whether the subject proposed relates to one or more of the fields of safety, EMC, the environment or quality assurance.

**Purpose and justification**

Give details based on a critical study of the following elements wherever practicable.

- The specific aims and reason for the standardization activity, with particular emphasis on the aspects of standardization to be covered, the problems it is expected to solve or the difficulties it is intended to overcome.
- The main interests that might benefit from or be affected by the activity, such as industry, consumers, trade, governments, distributors.
- Feasibility of the activity: Are there factors that could hinder the successful establishment or general application of the standard?
- Timeliness of the standard to be produced: Is the technology reasonably stabilized? If not, how much time is likely to be available before advances in technology may render the proposed standard outdated? Is the proposed standard required as a basis for the future development of the technology in question?
- Urgency of the activity, considering the needs of the market (industry, consumers, trade, governments etc.) as well as other fields or organizations. Indicate target date and, when a series of standards is proposed, suggest priorities.
- The benefits to be gained by the implementation of the proposed standard; alternatively, the loss or disadvantage(s) if no standard is established within a reasonable time. Data such as product volume or value of trade should be included and quantified.
- If the standardization activity is, or is likely to be, the subject of regulations or to require the harmonization of existing regulations, this should be indicated.

If a series of new work items is proposed, the purpose and justification of which is common, a common proposal may be drafted including all elements to be clarified and enumerating the titles and scopes of each individual item.

**Relevant documents**

List any known relevant documents (such as standards and regulations), regardless of their source. When the proposer considers that an existing well-established document may be acceptable as a standard (with or without amendments), indicate this with appropriate justification and attach a copy to the proposal.

**Cooperation and liaison**

List relevant organizations or bodies with which cooperation and liaison should exist.

**Preparatory work**

Indicate the name of the project leader nominated by the proposer.

**The structure of the standard**

The structure and the substance of the standard will complement IEC 61993-2 and will consist of a normative annex to be" used in conjunction with IEC 61993-2.
